

Activity 04

- Write Java programs for the following questions.

- 01) Write a Java Program to input five numbers into an array and calculate the average and sum of them.
- 02) Write a Java Program to input four numbers into an array and find the maximum value and the minimum value of those four numbers.
- 03) Write a Java Program to input the marks of 10 students to an array and count the number of students who have marks above or equal to 85.
- 04) Write a Java Program to input the names of four fruits into a string array. Define a float array to store the unit price of every fruit. Display the fruit name along with the unit price to the user.
- 05) Write a Java Program to read the salaries of 10 employees using an array and count the number of employees who are getting a salary from 35000 to 75000.
- 06) Write a Java Program to input the English, Music, Geography and History marks of 5 students into a 2D array. Display all the data elements of that 2D array.
